SUMMARY

Frontend developer with experience in building responsive UI components, integrating REST APIs, and implementing scalable features in React.js. Comfortable working in collaborative agile teams, with practical experience in reusable component architecture, state management, performance optimization, and debugging across real-world admin and CMS projects.

EXPERIENCE

Associate React Developer

Dec 2024 – May 2026

Bitskraft Pvt. Ltd., Kathmandu, Nepal

- Built and styled responsive UI components using React.js, TypeScript, Material UI, and Tailwind CSS.
- Integrated REST APIs for data fetching, form submissions, and CRUD operations including image and file upload support.
- Developed reusable modal components for create, edit, and delete workflows — reducing code duplication across features.
- Implemented client-side filtering using useMemo for small datasets and server-side filtering via query parameters for large datasets.
- Added debounce on search inputs to optimize API call frequency and improve UI performance.
- Applied conditional rendering to handle loading states, empty states, and API error responses.
- Managed global state using Redux and Zustand — storing API data and handler functions accessible across components.
- Worked on role-based access control UI — conditionally showing or hiding features based on user roles.
- Built dynamic pages in Next.js using file-based routing, dynamic routes, and SEO-friendly slugs with Server Side Rendering (SSR) for improved search engine visibility.
- Regularly identified and resolved UI and logic bugs throughout the development lifecycle.

EDUCATION

B.Sc. CSIT

Swastik College, Bhaktapur, Nepal

Intermediate Level (Science)

National Infotech College, Birgunj, Nepal

SKILLS

Languages & Frameworks: React.js, Next.js, TypeScript, JavaScript, HTML, CSS

Styling & UI: Tailwind CSS, Bootstrap, Material UI

State Management: Redux, Zustand, Context API

API Integration: REST APIs, async/await, Axios, error & loading state handling

Performance: Debounce, useMemo, client-side & server-side filtering, conditional rendering

Tools & Workflow: Git, reusable component architecture, dynamic routing, bug fixing

Next.js: File-based routing, dynamic routes, slug-based URLs, SSR, CSR
